Alesandro de Oliveira Binhara

Big Data Architect and Developer

ABOUT ME

I am a software engineer with over 20 years of experience in IT, specializing in product design and development. I have extensive expertise in big data, with more than 12 years of experience utilizing Apache Hadoop and the Hadoop Ecosystem to manage and process large amounts of data effectively. My communication, teamwork, planning, coordination, and strong leadership skills enable me to implement strategic initiatives in diverse environments. I am proficient in hands-on development and can bridge the technology gap between business users, database administrators, and developers. I have experience working on significant projects that require detailed planning and creativity. I can easily adapt to new situations, handle multiple tasks, and am self-motivated. With 14 years of experience leading cross-functional teams and completing projects remotely, I excel at managing my workload to meet tight deadlines.

EDUCATION

- Master of Science in Technology, 2006, Federal University of Technology - Paraná (UTFPR), with a focus on Project Management within a Community of Practice.
- Bachelor of Science in Data Processing, 2001, ESEEI University.
- Degree in Electronics, 1996, Federal Center for Technological Education of Paraná (CEFET-PR).

COMMUNITY

- Creator of Congress Data Science Summit 2018, 2019 and 2024 – www.dssbr.com.br
- Creator and maintainer of Big Data and IA user group <http://www.gubigdataia.com.br>
- Maintainer of the web portal www.hadoop.com.br
- Participation in the [Snowflake Summit 2023](https://www.snowflake.com/en/summit) - Congress in Las Vegas

LANGUAGE

- **Portuguese:** Fluent, advanced reading and writing.
- **English:** Advanced reading and Intermediate speaking level skills.
- **Spanish:** basic reading and speaking level skills.

EXPERIENCES AS SPEAKER

- Speaker at Workshop IOT – IEP 09/2016 “BIG DATA & IoT and applications. <https://bit.ly/38soCJn>
- Speaker at Data Science Summit 2018, FIEP e Tecpar “Virtual Reality and Data Science” <https://bit.ly/38pqWRp>
- Speaker at VI JAI - 10/2016 | “What does Facebook do with my photos??? And what does Big Data have to do with it???” <https://bit.ly/2RAUhBE>

RESUME

- 24+ years’ experience in software development and 10+ years of professional application development with a focus on enterprise application and data architecture, data with Hadoop. Experience with Bigdata Hadoop Tools, Spark Tools, Machine learning, and Data Streaming.
- Worldwide recognition made by Oracle in big data at Oracle Cloud “*Big Data Case in 2021 - RD Station, one of Latin America’s largest SaaS companies, was acquired by Brazilian enterprise software giant TOTVS in 2021*” <https://www.oracle.com/customers/rd-station/>”
- Since 2008 working on creating a Hadoop cluster. First Hadoop cluster installed in the Buscapé group from Hadoop 0.8 sources to run a recommendation system written in Java using MAHOUT.
- Passionate about programming and learning new technologies; High proficiency in coding in C#, .NET, and Java. Design, develop, code, test, and debug complex new software products, or make significant enhancements to existing software.
- Experience with Automation tests (Unit tests, Integration tests), TDD, BDD.
- Experience with Agile methodologies (XP, Scrum, Kanban)
- Designing, building, and implementing stable, high-quality, high-performance applications.
- Understanding of design patterns and architectural framework, SOLID Principles.
- Experience with Object Oriented Development/Programming (OOD/OOP)

EXPERTISE

Proficiency in: Java and C#

Best Practices: Solid, TDD, BDD, Mocks, Unit Tests

Big Data: Hadoop, MapReduce, Nifi, Pig, Hive, Airflow

Infra Structure: Linux, Python, Script shell

Cloud: Amazon Aws, Microsoft Azure , Google cloud, Oracle Cloud

EXPERIENCES WITH TECHNOLOGIES

Bigdata Hadoop Tools: Hive, HBase, flume, Sqoop, MapReduce programming (with Java, Pig, Scala, python), Apache Spark, Ambari, zookeeper, Kafka. Hadoop distributions like Oracle Big Data, Cloudera, Hortonworks, Acceldata Open Data Platform with production environment, build a learning machine, image processing with Hadoop-Hipi, real-time streaming processing, Data Bricks, Snowflake

Machine learning: Mahout, Spark MLIB, H2O

Oracle Cloud: Object Storage, Object Store , Autonomous Database, Big Data , OCI Compute.

Amazon cloud: EC2, S3, Redshift, EMR, SQS, DynamoDB.

Microsoft Azure: BI tools like Microsoft Power Query, Power Pivot with Development AppFabric, WorkRole, WebRole, HD Insights, MapReduce in C#.

NoSql: Mongo DB , Atlas Mongo DB, Redis, Realms, HBase, Impala

Servers Database: Oracle, MySQL, MS SQL Server, PostgreSQL., Informix, DB2, Prevalence of Objects in Java and C #, Object Database (DB4O), SQLITE, Realms.

Infra Structure: Linux, Script Shell, YAML, Terra Form, Git, Docker e Kubernetes.

Best Practices: SOLID, TDD, BDD, DDD, Unit Tests, Mocks , Extreme Programming, SCRUM, Automated Testing, Pair Programming, TDD, unit test, MVC, MVVM.

Platform Dot Net - 15 years of experience: Windows.Forms, LINQ, ASP.NET 2.0, MVC Asp.NET 1, 2, 3,4 and Core , Monorails, entity framework, Prism, Unity Container (Dependency Injection and IoC), MSTest (Unit Testing), Moq (Unit Testing Mock Framework), Json.NET , Blazor.

Java Platform, 7 years of experience: J2EE, Tomcat, Eclipse, JSP, Servlets, Struts.

Web Developer: HTML5, JavaScript ,NodeJS, Twiter Bootstrap, CSS, Apache, NIGX.

Programming Languages: Java, C#, Ruby, PHP, Pascal, Java script, shell script, pig, hive, scala

Tools: TFS, cvs, svn, git, trac, media wiki, Hudson, Redmine, GitHub, Maven.

Operation System: DOS, Win 3.1, Win95, Win98, NT4.0, Win2003, Win7, Win8, Win10 OS/2 2.1, BSD, Sun Solaris, FreeBSD, IBM zVM, Android, iOS , Mac OSX, Linux (RedHat, Suse, Mandriva, OpenSuse, Ubuntu).

TCP/IP: client and server, HTTP, NFS, FTP, SMTP, pop, smb, Apache web server

WORK EXPERIENCE

2020-2024 - Data Engineer Senior at RDStation.com

I work with bigdata team data engineer. Activity Support, improvements, and cost reduction with Hadoop cluster, support to the team of developers. Maintaining a Hadoop cluster with more than 100 Tera Bytes of data. Tools used: Hive, Ranger, Infra-Solr, Sqoop, AirFlow, presto, spark, ambari, Nifi, Sqoop, Atlas. Researches new tools for the team.

Hadoop Cluster:

- Migration of a Hadoop cluster from OCI to GCP.
- Training workshop with the Databricks team (20 hours).
- POC (proof of concept) with the Microsoft and Databricks team for testing Databricks for migration from Hive to Spark with Databricks.
- POC with the Snowflake team to test snowflake technology for migrating from Hive to Snowflake.
- POC with the Google team to migrate from HIVE to Big Query.

Snowflake at RDStation:

- Creating Hadoop integration with Snowflake
- Implementation of Snowflake as RDStation's data delivery layer.
- Creation of Snowflake training for a team of RDStation users

2015 – 2018 - Postgraduate professor at Unicamp University

- Big Data for Social Network Management; Big Data for IOT; Introduction Apache Hadoop (Hive, pig, Hdfs, MapReduce); Real-time processing and machine learning with Apache Spark

2014 – 2015 – Big Data Architect at Seebot

- Developing big data for Seebot company. Storing pictures and videos on HDFS, processing images in real-time using Hadoop-HIPI, Spark, Kafka, Flume, hive, MLIB, and Hadoop video streaming

2010 – 2013 - Research and Development Coordinator at Buscapé Company-buscape.com.br

- Hadoop Cluster system with engine recommendation – Consultant and developer in distributed systems and cluster processing and distributed file system for Hadoop company Ebehavior - BuscaPé Group. Integration of product recommendation system using artificial intelligence algorithms with the Cloudera Hadoop cluster. High-performance construction with cluster Hadoop. Learning machines research. Development systems MapReduce. System product recommendation using Hadoop and Mahout was developed this code was the first trial developed as an operating test. Source Sample
